

Data Analytics & Business Analytics WITH GENAI

In collaboration with

Vishlesan I-HUB Foundation
IIT Patna

Program Summary

Overview

A 6-month live, practitioner-led program designed to transform working professionals into data-driven decision makers using Data Analytics, Business Analytics, and Generative AI. The program is delivered in collaboration with Vishlesan I-Hub Foundation, IIT Patna.

By the end, you'll:

Build end-to-end analytics solutions

Apply GenAI to analytics workflows

Create business impact with data

Earn global and startup-recognized credentials

Who is this program for?

Business & Domain Professionals

1–10+ years

Apply analytics to finance, marketing, operations, HR, supply chain, and strategy roles.

Managers, Leaders & Entrepreneurs

5–10+ years

Leverage analytics and GenAI to guide teams, evaluate opportunities, and drive data-backed decisions.

1 How this course prepares you for **Career growth & transition in Analytics?**

It helps you transition into **data-driven roles** by building on your existing professional and domain experience.

The role isn't disappearing. The skill bar is moving up.

Today's high-impact professionals are expected to:

**Translate business questions
into data insights**

**Build analytics & GenAI-powered
decision systems**

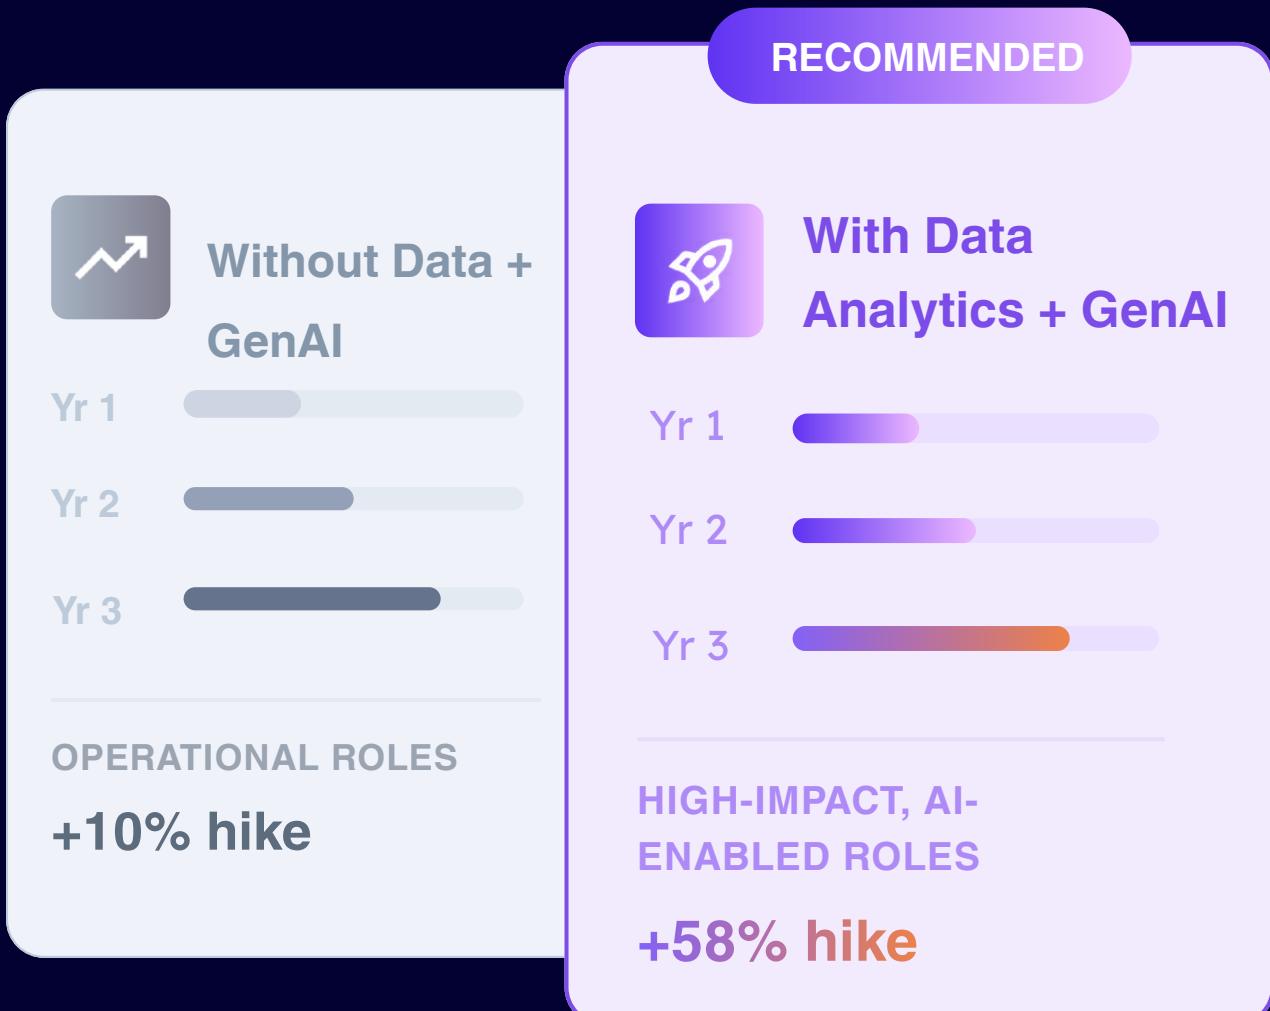

**Use GenAI to accelerate analysis
& reporting**

2 How does this course accelerate your growth in the **AI-powered analytics world?**

Because it upgrades how you think with **data, derive insights, and influence decisions**. This course accelerates growth by shifting you from reporting numbers to driving AI-enabled business outcomes.

3-YEAR CAREER TRAJECTORY

Alumni Spotlight

Mohd. Israr
Data Scientist

Thanks to the Learnbay data science course & excellent guidance, I was able to ace the TCS interview and secure a job with a 210% pay raise. The real-world time projects helped me develop my concepts as a data scientist.

3 Job Referral & Career Acceleration

No cold applications. Your profiles goes straight to decision makers

We refer you directly to hiring companies

WHAT THIS MEANS FOR YOU

Skip the ATS Black hole

Your resume reaches Humans not Algorithms

Access Exclusive Opening

Roles not posted to job boards

Matched to your skills

Job which is aligned to your profile and domain

4 Prepare to ace the interview

Get interview ready with expert guidance

Mock Interviews

5 Session with Industry Expert

Multiple Technical and HR Round with detailed feedback

AI-Optimized Resume

ATS-friendly and Job ready

Optimized to highlight your technical skills and domain expertise

Complete Support until Placed

We're with you in every step

5 What sets this program apart?

3-Year Flexible Subscription

Re-enter, upgrade, and refresh skills as data & AI evolve.

AI CoLab Experience

Work on real startup & enterprise-grade data + GenAI projects.

Earn 2 AI CoLab Certificates.

BYOP + Mentorship

Bring your own domain or business problem. Get 1:1 expert guidance to turn it into a data solution.

Industry Certification

Earn globally recognised credentials backed by IBM and Microsoft.

Program Certification

Certification from IIT Patna

Vishlesan I-Hub Foundation, IIT Patna enables hands-on innovation exposure and real-world Data Analytics & AI problem-solving.

Certification from IBM

Earn an **industry-recognized IBM Certification** validating your expertise in enterprise-grade Data Analytics and Business Analytics.

AI Startup Certificate

Why it matters:

This is your practical experience credential proof that you can use AI in the real world to solve actual problems.

Program Syllabus

Term 1 – Week 1-3

Foundations of AI Reasoning & LLM Workflows

LangChain

LlamaIndex

huggingface_hub

You'll Learn:

- How modern AI models **process, predict, and reason**.
- **Prompt engineering** for task control (role-based, few-shot, chain-of-thought).
- **Tokenization**, embeddings, and contextual memory for intelligent responses.
- **Retrieval-Augmented Generation (RAG)**: connecting private data to LLMs.
- **Ethics**, safety, and bias mitigation in AI responses.
- **Evaluating AI outputs** using qualitative and quantitative metrics.

Project:

AI Knowledge Assistant — Build an intelligent chatbot that retrieves and summarizes information from custom documents.

Outcome:

Confidently build and tune LLM-based assistants and foundation-model workflows using natural language.

Program Syllabus

Term 2 – Week 4-5

Generative & Multimodal AI for Real-World Content

 runway

DALL·E

Ideogram

Kaiber

 synthesia

ElevenLabs

Leonardo.Ai

You'll Learn:

- **Text-to-image, text-to-video, and text-to-audio generation.**
- Understanding **diffusion** and **multimodal** creativity.
- Building content workflows: **ideation** → **generation** → **feedback** → **iteration**.
- Using **AI for brand assets**, marketing visuals, and learning design.
- **Applying AI ethics in synthetic media** and responsible creation.

Project:

AI Content Studio — Build an AI system that produces marketing visuals, ad scripts, or video explainers aligned with brand guidelines.

Outcome:

Create consistent, high-quality multimedia content using GenAI tools — without coding.

Program Syllabus

Term 3 – Week 6-7

Agentic AI & Intelligent Automation

 zapier

 make

 n8n

 Agent AI

 VAPI

 slack

 Notion

You'll Learn:

- Fundamentals of **autonomous agents** and multi-agent reasoning.
- **Task decomposition** and tool calling for business workflows.
- **Connecting CRMs**, spreadsheets, and communication platforms.
- Using “**Vibe Coding**” to describe logic naturally for agents.
- **AI task chaining** and feedback loop automation.
- **Integrating AI** insights into daily business processes.

Project:

AI Workflow Co-Pilot — Create an automation system that reads data, triggers tasks, and delivers daily AI summaries or reports.

Outcome:

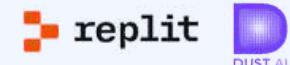

Build adaptive agents that plan, reason, and automate end-to-end workflows with minimal human input.

Program Syllabus

Term 4 – Week 8-9

No-Code App Development & AI Deployment

You'll Learn:

- **Low-code** and **no-code** app creation with AI integration.
- **Connecting APIs**, embeddings, and vector stores to create user-ready products.
- Designing **front-end interfaces** for **chatbots** and **copilots**.
- Testing endpoints, **debugging**, and managing data securely.
- **Collecting user feedback** and improving model performance.

Project:

AI Assistant Web App — Build and deploy an interactive web-based chatbot or business assistant connected to your AI workflows.

Outcome:

Deploy a functional, web-accessible AI solution usable by teams or clients.

Program Syllabus

Term 5 – Week 10-11

AIOps, Optimization & Observability

Vertex AI

Amazon SageMaker

Hugging Face

Power BI

Rows

Notion

You'll Learn:

- **AIOps essentials:** monitoring, observability, and self-healing pipelines.
- **Defining KPIs for AI** performance (accuracy, latency, cost, drift).
- Automating alerts, testing, and continuous improvement.
- Visualizing AI usage and cost with **BI dashboards**.
- **AI governance** and compliance considerations in production.

Project:

AIOps Dashboard — Create a performance monitoring dashboard that tracks AI output quality, latency, and cost metrics.

Outcome:

Understand how to monitor, optimize, and maintain AI solutions in real-world environments.

Program Syllabus

Term 6 – Week 12-14

Startup Collaboration Capstone: AI CoLab Experience

Combination of previously learned tools based on project type.

You'll Learn:

- Build your own AI product with **startup companies**.
- Product thinking and end-user problem solving.
- **Cross-functional teamwork:** business + tech + creative roles.
- Documenting, presenting, and pitching your AI solution.

Project:

Bring everything you've learned together by building a complete AI-powered solution whether it's an automation workflow, a co-pilot, a domain-specific AI assistant, or a full no-code web app.

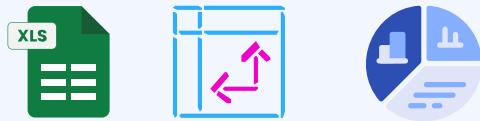

Outcome:

By the end of this capstone, you will graduate with a startup-ready AI product, plus a verified Startup Experience Certificate through the AI CoLab partnership.

Program Syllabus

Term 7 – Week 15-17

Excel

You'll Learn: Analytics Essentials with Excel

- **Excel Basics & Core Functions:** Interface, data types, formulas
- Lookup functions, conditional functions, and text functions.
- **Data Preparation & Cleaning:** Import/export, missing data handling, validation, formatting
- Power Query for cleaning & automation.
- Statistical & Analytical Techniques: Descriptive statistics, exploratory analysis, filters/sorting, what-if analysis, goal seek.
- **Pivot-Based Analysis:** PivotTables for summarization, grouping, segmentation, slicers, and data-driven insights.

Project:

Employee Performance & Attrition Dashboard:

Build an Excel dashboard to analyze employee performance, satisfaction, and attrition patterns for workforce decisions.

Program Syllabus

Term 7 – Week 15-17

Excel

You'll Learn: **Visualization & Advanced Analytics**

- **Charts & Visualization Methods:** Bar, line, pie, scatter, combo charts, advanced charting, conditional formatting for insights.
- **Interactive Dashboards:** PivotCharts, KPI visuals, storytelling layouts, mini dashboard creation.
- **Data Modeling & Power Tools:** Power Pivot, relationships, basic DAX concepts, Excel add-ins for extended analytics.
- **Projects & Applications:** Business case studies, forecasting, reporting mini-projects, and real-world analytics workflows.

Project:

Business Performance Insights Dashboard

Analyze a real business dataset using Excel charts (bar, line, scatter, combo), apply conditional formatting for insights, build an interactive dashboard with PivotCharts and KPIs, and use Power Pivot with basic DAX for forecasting and decision-ready reporting.

Program Syllabus

Term 8 – Week 18-21

SQL (Structured Query Language)

You'll Learn: SQL Fundamentals

- **Core SQL & RDBMS Basics:** Syntax, data types, tables, CRUD operations, querying single tables.
- **Filtering & Retrieval:** WHERE, ORDER BY, DISTINCT, logical operators, formatting results.
- **Joins & Multi-Table Queries:** INNER, LEFT, RIGHT, FULL, CROSS joins, UNION, subqueries, nested queries.
- **Aggregations & Analytics:** GROUP BY, HAVING, summary stats, ranking functions, Top-N analysis.

Advanced SQL for Analytics

- **Views & Modifications:** INSERT/UPDATE/DELETE, creating views, inline views.
- **Optimization:** Indexes, execution plans, performance tuning.
- **Advanced Database Concepts:** Normalization, stored procedures, functions, triggers, user-defined objects.
- **SQL in Practice:** Integrating SQL with Python, advanced analytical queries for real datasets.

Project:

SQL Sales Aggregator

Write complex SQL queries to aggregate and analyze sales data from a relational database.

Program Syllabus

Term 9 – Week 22-24

PowerBI

You'll Learn: Power BI Essentials

- **Data Prep with Power Query:** Clean, transform, merge, unpivot, format text/date/number fields.
- **Data Modeling:** Relationships, granularity, aggregations, time-series basics, calculated columns.
- **Core Visuals & Interactivity:** Bar, pie, line, maps, cards, slicers, filters, drill-down, bookmarks.
- **Connecting & Working with Data:** Load from Excel/SQL, model views, query editor, BI best practices.

Visuals, Dashboards & DAX Analytics

- **Advanced Visuals:** Funnel, ribbon, waterfall, treemap, gauge, scatter, KPIs & combos.
- **DAX for Analytics:** Measures, calculations, time-intelligence functions.
- **Dashboard Design:** Layouts, formatting, interactivity, storytelling, sharing & collaboration.
- **Projects:** Customer segmentation dashboard, exploratory BI reports, hands-on visual assignments.

Project:

Campaign Report

Build a Power BI marketing campaign report with DAX measures.

Program Syllabus

Term 10 – Week 25-27

Tableau

You'll Learn: Tableau Essentials & Data Preparation

- **Connecting & Preparing Data:** Data types, joins, blending, pivots, transformations, SQL connections.
- **Core Visual Building:** Bar, line, pie, scatter, bubble, maps (geo, custom geocoding, polygon, WMS).
- **Data Exploration Tools:** Filters, groups, sets, parameters, drill-down, marks, dimensions & measures.
- **View & Layout Tools:** Shelves, cards, sorting, formatting, captions, exporting, metadata management.

Visual Analytics & Dashboards

- **Advanced Visuals:** Tree maps, heat maps, bump charts, funnel, waterfall, histogram, bullet & motion charts.
- **Calculations & Analytics:** Calculated fields, LOD expressions, trends, forecasting, predictive visuals.
- **Dashboards & Storytelling:** Interactive dashboards, stories, actions, design best practices, publishing & collaboration (Tableau Online).
- **Projects & Applications:** Build multi-chart dashboards, map-based visuals, predictive model integration.

Project:

Interactive Sales Dashboard

Create a Tableau sales dashboard with interactive filters, drill-down capabilities, and real-time data refresh.

Program Fee

Rs. 1,20,000/- + GST

No Cost EMI Available for 3, 6 and 9 Months
