Learnbay

Advanced AI and ML
Certification Program

175% Average Salary Hike

450+ Hiring Partners

Project Innovation Lab

CONTEXT

About The Program

2cr
worth scholarships awarded

600+
professionals secured jobs after a career break

30k+
Trusted Learners

Our Advanced AI & ML Certification Program is designed for professionals who are seeking to gain hands-on experience using cutting-edge tools and techniques. Develop a deep understanding of AI algorithms, neural networks, and data analysis while mastering Python, TensorFlow, and scikit-learn. Our program empowers you with the skills and practical knowledge needed to excel in today's data-driven world. This program will elevate your career prospects and make you a sought-after AI and ML expert.

"

We exist to provide accessible, reasonable, and industry-relevant education that empowers India's workforce to grow and develop.

4.79/5   4.66/5   4.8/5   Great Place To Work Certified

Program **Highlights**

Industry-Relevant & Updated Syllabus

Learn the industry's latest tools, techniques & trends. Gain hands-on experience developing various apps.

360 Degree Knowledge Building

Develop practical skills through real-world projects and assignments.

1:1 Dedicated Mentorship

Personalized learning experience from experienced industry professionals.

Multiple Career Opportunities

Grow your career in data science and AI by targeting roles like data scientist, machine learning engineer, data architect, etc.

Program Details

COURSE PREREQUISITE

Prior knowledge of **programming/coding** is not mandatory. Just the urge to learn programming and basic ideas about advanced math is enough.

PROGRAM ELIGIBILITY

✅ **Working professionals** having more than 1 year of experience in any technical domain

KEY FEATURES

✅ Domain Electives (BFSI, Retail, Supplychain, HR, Marketing, Healthcare)

✅ Dedicated Placement Cell | 100% Guaranteed Interview calls

✅ Globally Recognised **Certification from IBM & Microsoft**

JOB ROLES TO TARGET

Get equppied with the industry relavant skills and aim for job roles like Sr. Data Scientist, Machine Learning Engineer, AI Engineer, BI Developer, Big Data Architect, Sr. Data Analyst etc.

Alumni Spotlight

Shravanthi A
Data Scientist

Learnbay has helped me a lot to learn data science applications in the e-commerce industry. The live class concept was really helpful in receiving proper DS training. Thanks to all my mentors and the placement team.

| Mechanical Domain | → | Data Scientist @ Ford | 📈 **230%** Salary Hike |

Preksha Mishra
Lead Data Scientist

The course structure is excellent with emphasis on concept building and tools & software at the same time. The support team is excellent and supportive and quite agile to respond to doubts.

| Telecom Domain | → | Data Scientist @ HCL | 📈 **140%** Salary Hike |

Karan Chawala

Alumni Spotlight

Thanks to the Learnbay data science course & excellent guidance, I was able to ace the TCS interview and secure a job with a 210% pay raise. The real-world time projects helped me develop my concepts as a data scientist.

Mohd. Israr
Data Scientist

| Mechanical Domain | ➡ | Data Scientist @ | tcs | 📈 **210%** Salary Hike |

When I joined Learnbay I did not have any knowledge apart from the very basics. I gradually build my concept via various trainers and get trained in data science with strong knowledge/concepts.

Saurabh Kumar
Data Scientist

| Mathematics Professor | ➡ | Data Scientist @ | Teleperformance | 📈 **135%** Salary Hike |

Learnbay's ProjectLab

Choose Learnbay for your career journey because we're more than just a training provider. Our Project Innovation Lab lets you apply your skills in real-world scenarios. Get dual certifications for a competitive edge. Specialize in your desired domain. Discover how Learnbay can boost your career growth. Don't settle for less – choose Learnbay, your path to success!

1 Project Innovation Lab

Work in an industry like environment and gain practical hands-on experience of data scientist with dedicated mentors from industry.

2 Domain Electives

Enhance career prospects and excellence in your chosen field with our domain electives.

3 Dedicated Placement Cell

Experience 100% job assistance with guaranteed interview call from leading MNCs and startups globally.

4 Degree & Certification

Gain top-notch skills for a successful career through our degree and certification program

Project Innovation Lab

Learnbay's Project Innovation Lab replicates industry like environment for real time projects. With our **ProjectLab,** you gain real proof of hands-on experience by having your project certified by the industry.

In our ProjectLab, you work like a data scientist with dedicated project mentors from industry and get certified on capstone project.

450+
Hiring Partners

📍 **PUNE**

1-1 Doubt Session

📍 **HYDERABAD**

Capstone Project Certificate from IBM

📍 **DELHI**

📍 **BENGALURU**

Project Innovation Labs Across India

2 Domain **Electives**

We offer Domain Electives for various industries including BFSI, Retail, Healthcare, Manufacturing, and Supply Chain. This ensures that you gain expertise directly relevant to your current domain.

With our program, you can make your past domain experience relevant and position yourself for a significant salary hike.

(Select any two)

BFSI

Advanced analytics for risk assessment and fraud detection in finance.

Brochure ↓

Healthcare

Data-driven insights for improved patient care and medical research.

Brochure ↓

Manufacturing

Optimising operations with data analytics and predictive maintenance solutions.

Brochure ↓

Supplychain, E-com & Retail

Enhancing supply chain visibility and customer experience with data.

Brochure ↓

Sales, Marketing and HR Domain

Data science can help marketers tailor their efforts to suit individual needs and preferences.

Brochure ↓

Energy Oil and Gas

Data science can help the energy and utilities industry optimize the performance of critical assets.

Brochure ↓

Media, Hospitality & Transportation

help businesses improve personalization, implement dynamic pricing, and perform predictive maintenance

Brochure ↓

3 Career Service

Get 1 Year of Job and Placement support

Unleash your career potential with 1 year of unlimited job access, interview support, and profile review.

1 Mock Interviews with Industry Experts

Master the art of data science & AI and stay ahead of the curve with mockups and industry insights

Resume Building Session

Craft a powerful resume showcasing your expertise in software development to stand out from the competition

4 Interview Cell

Receive 4 interview calls from a diverse pool of interested employers/recruiters.

4
Certificates

World's leading certifcations

IBM

IBM Course Certificate

Complete your training with the globally recognized certificate.
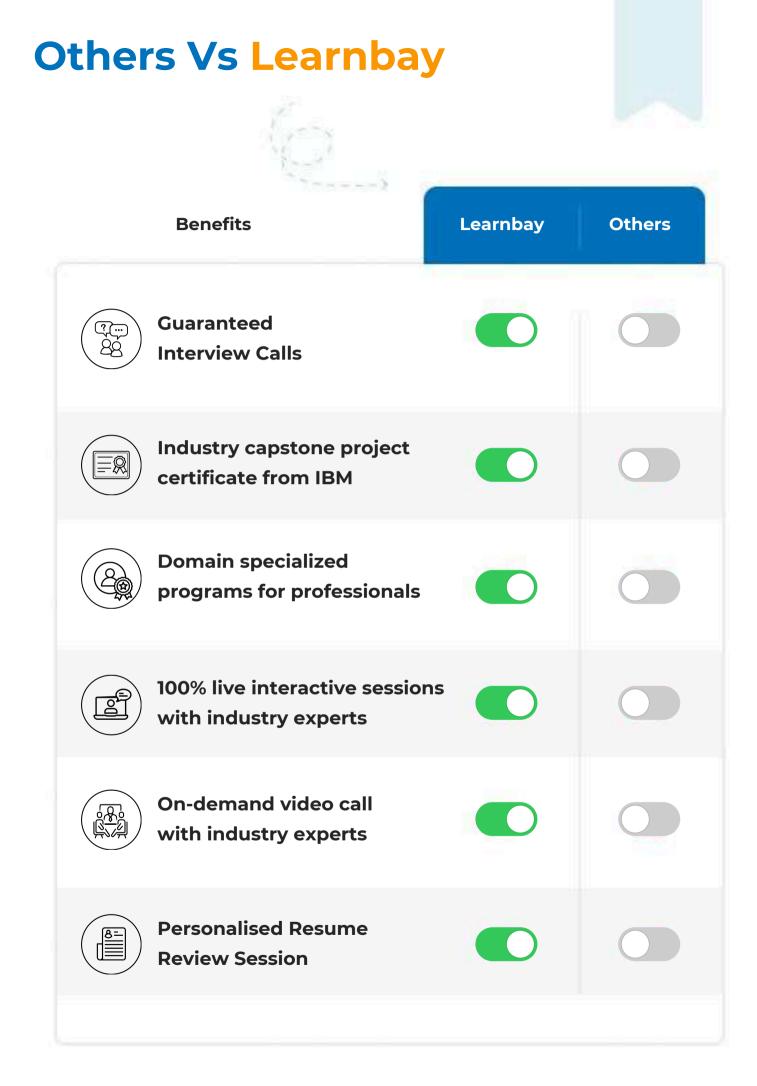

Microsoft

Microsoft Course Certificate

Achieve professional growth & increase earning potential with Microsoft certification.

IBM

IBM Capstone Project Certificate

Highlight your skills & boost your project portfolio with capstone project certificate.

Others Vs Learnbay

Benefits	Learnbay	Others
Guaranteed Interview Calls	✅	⬜
Industry capstone project certificate from IBM	✅	⬜
Domain specialized programs for professionals	✅	⬜
100% live interactive sessions with industry experts	✅	⬜
On-demand video call with industry experts	✅	⬜

Learning Path

L1 — Cohort Orientation + Special Programming Classes

L2 — Python Programming (Basic + Advance)
Python, Anaconda, Github, Pandas

L3 — Statistics and Machine Learning
Matplotlib, Scikit-Learn, Seaborn

L4 — Data Science Tools
SQL, MongoDB, Tableau, PowerBI, Big Data & Spark Analytics, Time Series

L5 — AI Tools
Deep Learning, NLP, CV, RLm MLOps

L6 — Deployment & Essentials
Deployment (AWS+Azure), Excel, MLOps

L7 — AI Generative Tools and Future Trends
ChatGPT, Midjourney, DALL·E

Program **Syllabus**

Preparatory Session   08 Hours

Cohort Orientation

- A brief introduction to tools related to data
- Learn about particular real-time projects and Capstone projects
- Data and its impact on career opportunities
- Utilizing data, to enhance industrial operations and management

---

Fundamentals of Programming

- Introduction to Anaconda & Jupyter notebook
- Flavors of python
- Introduction to Git, GitHub
- Python Fundamentals

Tools covered | python   ANACONDA.   jupyter   GitHub

Fundamentals of Statistics

- Mean, Median, Mode
- Standard Deviation, Average. Probability, Permutations, and Combinations
- Introduction to Linear Algebra

Note:

This session is specially designed for non- programmers to understand basics of computer programming ₉nd math.

Those who wish to brush up their programming skills can also attend this session.

Program **Syllabus**

Python programming | 40 Hours

Basic Python

- Programming Basics & Environment Setup
- Strings, Decisions & Loop Control
- Python Data Types
- Functions And Modules
- File I/O An d Exceptional Handling and Regular Expression

Class Hands-on:
6 programs/coding exercise on string, loop and conditions

8+ Programs to be covered in class of functions, Lambda, modules, Generators
and Packages

10+ Programs to be covered in class from File IO, Reg-ex and exception handling

Tools covered | NumPy | pandas | matplotlib | seaborn

Advance Python

- Data Analysis Using Numpy
- Data Analysis Using Pandas
- Data Visualization using Matplotlib
- Data Visualization using Seaborn

Includes coding challenges & assessment

3 Case Study on Numpy, Pandas, Matplotlib
1 Case Study on Pandas And Seaborn

Real time project will be covered after Python completion with 2 hours of assessment (coding and objective questions)

Program Syllabus

Statistics and Machine Learning   70 Hours

Statistics

- Fundamentals of Math and Probability
- All about Population & Sample
- Statistical Thinking

- Descriptive & Inferential Statistics
- Hypothesis Testing
- Linear Algebra
- Data Processing & Exploratory Data Analysis

Hands-on:

Problem solving for C.L.T Problem solving Hypothesis Testing Problem solving for T-test, Z-score test Case study and model run for ANOVA, ANCOVA

Machine Learning

- Data Preprocessing
- Logistic Regression Model
- Evaluation Metrics for Classification model
- K Nearest Neighbours Model
- Decision Tree Model
- Random Forest Model

- Hyperparameter Tuning
- Naive Baye's Model
- K Means and Hierarchical Clustering
- Hierarchical Clustering
- Principal Component Analysis(PCA)
- Support Vector Machine(SVM)

Case studies:
- To classify an email as spam or not spam using logistic Regression
- Application of Linear Regression for Housing Price Prediction
- Recommendation Engine for e-commerce/retail chain
- Twitter data analysis using NLP

Note : *All Machine Learning Algorithms are covered in depth with real time case studies for each algorithm.* ***Once 60% of ML is completed, Capstone Project will be released for the batch.***

Program **Syllabus**

Big Data Analytics and Visualization   86 Hours

SQL

- SQL and RDBMS
- NoSQL, HBase & MongoDB
- JSON Data & CRUD
- Programming with SQL

Assignments
- Working with multiple tables
- Practice Joins, Grouping and Subqueries
- Using GROUP BY and HAVING Clauses
- Practice Aggregation Queries

MongoDB

- MongoDB Ecosystem
- MongoDB Structures
- MongoDB Shell vs MongoDB Server
- Data Formats in MongoDB
- Working with MongoDB Compass
- Working with Numeric Data
- Working on Scheme Designing

Assignment

Obtain the data in the format you want by formulating queries that are both effective and high-performing.

Projects are the culmination of your learning journey, where you will tackle real data-related problems.

Tableau

- Dashboard and Stories
- Visual Analytics
- Custom Geocoding
- Polygon Maps
- WMS and Background Image

Assignments
- Connecting data source and data cleansing
- Working with various charts
- Deployment of Predictive model in visualization

Download Detailed Curriculum

Program Syllabus

Big Data Analytics and Visualization — 86 Hours

PowerBI

- Overview of the Workflow in Power BI Desktop
- Introducing the Different Views of the Data Mode
- Working with Time Series
- Scatterplots and BI Reports
- Connecting Dataset with Power BI

Assignments
- Create Bar charts
- Create Pie charts
- Create Tree maps
- Create Donut Charts
- Create Waterfall Diagrams
- Creating Table Calculations for Gender

Sparks Analytics

- Introduction To Hadoop & Big Data
- Hadoop Master: Slave Architecture
- MapReduce Architecture
- Introduction to Spark SQL and Data frames
- Using R-Spark for machine learning

Hands-on
- Map reduce Use Case 1: Youtube data analysis
- Map reduce Use Case 2: Uber data analytics
- Spark RDD programming
- Spark SQL and Data frame programming

Tools covered | Spark | SQL | hadoop | PySpark

Download Detailed Curriculum

Program **Syllabus**

Big Data Analytics and Visualization — 86 Hours

Time Series

- Basics of Time Series Analysis and Forecasting
- Method Selection in Forecasting
- Moving Average (MA) Forecast
- Different Components of Time Series Data
- Log Based Differencing, Linear Regression for Detrending
- ARIMA Model Calculations, Manual ARIMA Parameter
- Selection ARIMA with Explanatory Variables
- Understanding Multivariate Time Series and their Structure

Assignment
- Time series classification of smartphone data to predict user behavior
- Performing Time Series Analysis on Stock Prices
- Time series forecasting of sales data

As Term 3 concludes, the following phase will involve an extensive exploration of all modules. This will be complemented by practical examples, demanding assignments, and culminating with your Capstone Projects.

This approach aims to enhance your understanding and real-world application of the modules.

Download Detailed Curriculum

Program Syllabus

Advance AI   144 Hours

Deep Learning using TensorFlow

- Neural Network
- Simple Computation, Constants, and Variables
- Back-propagation – Learning Algorithm and visual representation
- TensorBoard
- Convolutional Neural Network (CNN)
- Deep CNN
- Introducing Recurrent Neural Networks skflow: RNNs in skflow
- Understanding Of TFLearn APIs
- Understanding Keras API for implementing Neural Networks

Project
- Building a CNN for Image Classification
- Project on backpropagation using Neural Networks with Tensor Flow
- SPAM Prediction using RNN
- Image Classifier using PyTorch

Natural Language Processing

- Text Analysis
- Text Pre Processing Techniques
- Levenshtein distance - measuring the difference between two sequences
- Problems and solutions, LCS Algorithms
- Information Retrieval - Precision, Recall,F- score TF-IDF

Use cases on NLP
- Sentiment analysis for marketing
- Toxic comments classification
- Language identification
- Generating research papers titles
- Application to translate and summarize the news
- RESTful API for similarity check

Includes coding challenges & assessment

Program **Syllabus**

Advance AI   **144 Hours**

Computer Vision

- Image Filtering
- Image Processing
- Image Classification and segmentation

Projects
- Single Shot MultiBox Detecton
- Object Localization find an object in an image

Real-time Use Cases
- Single Shot MultiBox Detector
- Object Localization
- How would you find an object in an image
- The Problem of Scale and Shape SSD in Tensorflow
- Haar cascade - face and eye detectio

Reinforcement Learning

- OpenAI Gym Basics
- Dynamic Programming - Prediction, Control, and Value
- Approximation Approximation Methods for Reinforcement Learning

Important
- Deep Q-Learning Techniques Deep Q-Learning in Tensorflow for CartPole
- Solving Taxi Environment
- Solving Frozen Lake Environment
- Reward Discounting

Deployment AWS+Azure

- Data Preparation and Feature Engineering
- Model Training and Evaluation
- Model Deployment and Management
- Advanced Topics in Machine Learning on AWS and Azure

Program Syllabus

Essentials   40 Hours

DSA

- Array Overview
- String
- Linked List
- Queue
- Stack
- Heap
- Trie
- Tree, Binary Search Tree and AVL
- Tree Segment Tree
- Graph & Recursion
- Introduction to recursion
- Backtracking Algorithm
- Searching
- Sorting
- Greedy Algorithm
- Pattern Searching
- Dynamic Programming

Download Detailed Curriculum ⬇

Program **Syllabus**

AI Generative Tools and Future Trends

Emerging Trends in AI and Generative Modeling

- Exploring other AI generative tools beyond ChatGPT and DALL·E
- Overview of Midjourney
- Discussion on future trends and advancements in AI generative tools
- Open-ended project and/or presentation on a selected topic, incorporating learned concepts

Natural Language Processing and ChatGPT

- Introduction to natural language processing techniques
- Understanding ChatGPT and its architecture
  Hands-on exercises using ChatGPT for text generation
- Fine-tuning ChatGPT for specific applications

DALL·E: Image Generation with AI

  Exploring image generation using DALL·E
- Hands-on exercises for creating unique images with DALL·E
- Ethical considerations and limitations of AI-generated images

Graph Neural Networks (GNN) for Data

- Overview of Graph Neural Networks (GNN) and their applications
- Hands-on exercises using GNN for tasks such as node classification and link prediction
- Case studies on real-world applications of GNN in data science

Program Syllabus

Python Bootcamp for AI

- Python Essentials: Syntax, Data Types, and Variables
- Flow Control: Conditionals and Loops

Build Your Interview Assistant

- Project Overview: Interview Automation Bot
- Components & Architecture
- Natural Language Models (LLMs): Introduction and Uses

Large Language Models (LLM)

- Historical Overview of NLP: From Rule-Based Systems to Machine
- Learning. Evolution of Neural Network Architectures in NLP.

Visual AI for eCommerce

- Introduction: Digital Transformation for Offline
- Businesses Multimodal Models: DALL-E and Beyond
- Style & Photography Principles for Visual AI

Intelligent News Aggregator

- Project Outline: Personalized News Recommendation
- GPT-3 & Copilot for Code Automation

Program Syllabus

Customer Support Bot - HelpMate Pro

- Project Introduction and Components
- Embeddings vs Fine-Tuning: When and How
- Semantic Search in Customer Service

Knowledge Discovery Bot

- Project Overview and Architecture
- LangChain Tools and Concepts

Azure OpenAI Integration

- OpenAI on Azure: Services and Scalability
- Revisiting HelpMate Pro: Scaling Strategy

The Future & Ethics of Generative AI

- Responsible AI: Bias and Fairness
- Future Trends: Multimodal Models and RLHF
- Closing Remarks
- Assessment: MCQ

Capstone Project (3 Weeks)

- Building an Integrated Prompt Engineering Solution
- Project Submission and Peer Review

The **IBM** exam will be conducted for all the modules after completion of the course

Real-time Projects

J.P.Morgan

Learn and develop classification techniques for the digital transformation of banking

JPMorgan offers tax-friendly insurance choices. You can help them forecast insurance premiums. Targeted marketing using your Random Forest Algorithm skills can help obtain better premium values.

python pandas scikit learn

NETFLIX

Building a content recommendation model on the basis of regional viewer categorization

Netflix is a global entertainment video streaming site. They offer content in various regional languages. Build a local recommendation engine for Netflix customers residing in south Bangalore on their weekend and weekday activities, utilizing NLP.

NumPy SQL Jupyter

OLA

Reduction of waiting time via a highly precise forecasting model

Make a demand forecasting model based on specific time period rider demands. Such a model will help both riders and cab drivers to ensure the least possible waiting time. You can include measures like latitude and longitude identification.

python TensorFlow Apache Spark

saudi aramco

Understanding in-depth about logging while drilling (LWD) technique

Saudi Aramco company is working on the development of high-efficiency drilling models. Use the bright sides of big data analytics to identify the most cost- effective and highly productive drilling sites.

hadoop matplotlib aws

Real-time Projects

Career progression planning of employees with workforce defections and efficiency

IBM intends to boost its HR department by identifying employees' masked inconsistency. They need models to identify the graphical variations in their 14000+ employees' performances. Help them build models with your regressions and other ML abilities.

python | pandas | scikit learn

Descriptive study of trends and irregularities with prediction analysis for conversion

Swiggy seeks a broad marketing campaign. But they need automated keyword generation tools & proper message preparation and delivery of the same to the right audience at the right time. Help them with text analytics and NLP-based keyword research.

TensorFlow | SQL | Jupyter

Forecasting future sales with trends and price maximization

BMW customers can sell old vehicles, but rivals provide superior resale prices. BMW's data science-powered software will deliver the greatest market value for used vehicles based on Km travelled, daily price changes, production dates, etc. Such tasks build analytical abilities.

K Keras | GitHub | scikit learn

Understanding covid-19 cases and fatality rate by time series forecasting

Samsung will launch a new healthcare app soon. The key goal of this app is an accurate human activity tracking and providing relevant health-related recommendations. Continuous analysis with of a massive amount of mobile data is required for such an app.

python | matplotlib | Azure

Real-time Projects

Churn forecasting for the telecom industry using Python programming with Machine Learning

The goal of this project is to design a precise customer churn prediction model. Based on the same, Jio can identify the exact reason for customer dissatisfaction and work accordingly.

ggplot2   **git**   **XGBoost**

## Recommendation system with Customer Lifetime Value (CLV) analysis

Amazon wants to find the most successful electronics. Live consumer reviews are needed. Using data visualisation, help regenerate consumer insights from ongoing and current reviews.

python   *SQL*   *Jupyter*

Condition-based preventative maintenance and fault prediction in depth

This project helped BOSCH to predict their internal failures by production line dataset analysis. But still, they are struggling to predict automated faults in their assembly stage. Help them by building more advanced predictive models for assembly stage monitoring.

python   *TensorFlow*   *scikit learn*

Automated inventory monitoring for supportable supply chain management

An automated inventory management system will keep track of stock levels and upcoming orders. In addition, you can contribute to DataCo's intelligent supply chain software generation project by using ML algorithms and Python programming skills.

Jupyter   *NumPy*   *pandas*
